

File safety cabinet with electronic combination lock

Item no. 4443.TR

- Steel structure in compliance with UNI EN 10130, 1.5 mm thick. Rounded edges to avoid abrasion. Two holes on the rear for fixing to the wall.
- Door rebated on three sides; pull-resistant hinge side. Steel door back cover 2 mm thick. Knob with programmed breakage steel shaft: if forced, the knob will break before the mechanism. Emergency opening through a special profile key and protected cylinder. Equipped with 2 special profile emergency keys.
- Steel made rotating deadbolts resistant to attack: 2 horizontal Ø 22 mm and 2 vertical Ø 22 mm.
- ADA compatible keypad with Braille markings and sound confirmation. LED indicators confirm if operations are correct or wrong, if a new code has been set and alert when batteries are almost empty. Code (from 3 to 8 digits) can be changed only when door is open.
- Capacity:
4 adjustable-height shelves, each one with 15 kg max. capacity.

● **Optional:**

On request:
the cabinet painted with a technique providing an elegant
"wood colour" finish (add **“.L”** at the end of the item code).

Safety box for ammunitions/objects equipped with a Fai by Viro lock, supplied with 2 keys.
Internal shelves suitable for laptops and printouts (internal shelves kit packed separately)

Low consumption electronic board. Internal power supply (4 alkaline 1.5V batteries). Non-volatile memory: the stored codes are not erased when power supply is removed
