RAM-TOUCH II

SELECT WITH A KEY
OPENING . . .

. . . OR CODE

. . . OR FINGERPRINT

16 MEMORY POSITIONS FOR CODES OR FINGERPRINTS:

1. Manage
fingerprints

Position no. 16
Store Master?

THE 16TH POSITION IS RESERVED TO THE MASTER FINGERPRINT

this, if memorized, not only allows the opening, but controls other fingerprints' operations. If present, the Master fingerprint will be always required to confirm memorising or erasing operations of other fingerprints.

AUDIT TRAIL OF THE LAST 60 OPERATIONS IN THE MEMORY TO KNOW, WITH THE DOOR OPENED:

- who last opened the safe and when (date, time and which memory position has opened the door);
- how many attempts have been made to open the safe with wrong codes;
- if and when the safe activated the safety block;
- if and for how long an opening delay has been activated;
- if the safe was opened with the patented emergency key;
- changes to the menu settings.

SPECIAL SECURITY FUNCTIONS

Climate
T:+020°C H:029%

Ram-Touch controls temperature and humidity inside the safe.

Humidity alarm
[OFF] ON

An acoustic alarm that can be activated by the user warns of the possible formation of condensation to prevent the oxidation of jewels or watches or damage to any documents.

4.1 Delayed
opening

Opening delay (break-in-proof): the time delay can be set by the user.

4.2 Silent
alarm

4.4 Vibration
alarm

Allarme silenzioso e allarme vibrazione set up for connection to a burglar alarm and/or to a dialer. For real time warning, if the safe is opened with a memorized fingerprint or code but under constraint, or to warn in case of burglar attempt.

THE RAM-TOUCH II RECOGNITION SYSTEM:

- is a patented Viro exclusive;
- fingerprints can be memorized or erased with simple operations, but only with the door open;
- recognizes fingerprints by swiping your fingertip across the reader;
- it is powered by 4 alkaline 1.5 Volt batteries;
- it shows the battery recharging level and warns, with acoustic and visual signals, that the batteries are almost flat;
- it has got a non-volatile memory, which means that stored codes and fingerprints, and the audit trail data, are not erased if the batteries are removed.

- **WITH AN EMERGENCY OPENING CYLINDER AND TWO PATENTED PROFILE KEYS, THAT CAN BE ONLY DUPLICATED BY VIRO** (sending a fax with a photocopy of the ownership card supplied in a sealed envelope with the keys). The cylinder is protected by an anti-drill case-hardened steel plate, resistant to attack.

- **OPTIONAL - EXTERNAL POWER SUPPLY:** that, if the batteries are completely flat and the emergency keys are not available or have been lost, connects to the control panel and transmits the charge necessary to swipe your fingerprint or enter the code and open the safe.

Item. 4642.0314

“RAM-TOUCH II” SAFES ARE AVAILABLE IN WALL VERSIONS AND FREE STANDING VERSIONS

A richiesta:

Vertical free standing version suitable to contain briefcases, printouts and laptops.

RAM-TOUCH II SAFETY CABINETS

Emergency cylinder, placed under the blue cap, protected by a burglar-resistant, anti-drill plate, in case-hardened and tempered steel."

Safety box for ammunition/valuables with Fai by Viro chrome-plated zamak lock with 2 nickel-plated brass keys.

Per la versione portafucili:

High density scratch-proof polyethylene gun-butt base and barrel support (thicker to guarantee the perfect positioning of single or double barrel guns, even if fitted with optics).

Digital weather station, complete with battery, can be positioned by the user as required, on the cabinet or elsewhere, which provides the following information: date and time; alarm clock; immediate temperature and humidity (with maximum/minimum values and alarm if they reach critical levels); weather forecasts and lunar calendar (item 4450.0315).

The cabinet is painted with technique providing an elegant "wood colour finish"

4480.T10.L

4480.TR10.L

For file cabinets:

4 file shelves with dimensions suitable for laptops, printouts and files; 15 Kg. max. capacity each, can be positioned by the user as required.

On request: inside lighting module (item 1.4383.0312) that lights up when the safety box is opened, for easy identification of small items inside. Supplied with battery.
