

Viro ² **RUOTE**

GPS-GSM SATELLITE-BASED BURGLAR-ALARM MODULE **VIRO M.A.S.**

- Advanced satellite-based burglar-alarm portable module with reliable movement sensor and GPS antenna; can be placed on the motorbike truck, under the seal or hanged to the motorbike frame. By inserting a SIM card into the module and after sending to this an SMS message from your mobile phone, the module is able to send warning messages during theft attempts and, in case the motorbike has been stolen, to trace its position sending the coordinates of the stolen vehicle. Working with batteries (already included)
- The Module can be integrated to Viro Sonar alarm disc lock (even if purchased separately) and, through a wireless communication, detects and send to the motorbike owner any theft attempts sent by the disc lock after the alarm siren sounds
- Electronic component housing protected against water drops. Many electronic settings can be adjusted by the user. Supplied with an attractive sticker that can be placed on the windshield indicating the presence of a Viro security alarm system
- Activation by cylinder and key (supplied with 2 nickel-plated brass keys with soft non-slip PVC covered head); or by remote control.
- **Technological and versatile, recommended for keeping any means of transport to which it is applied under control; perfect if combined with alarm disc lock Viro Sonar, safe and resistant in the locking of any type of scooters or motorbikes, especially of high powered ones**

LED indicator confirming the operations. Detailed user instructions, placed under the Module itself

Elegant visual packaging summarizing product main technical and operational features. It can be hanged vertically by means of the apposite buttonhole
