

*Gun safety cabinets key operated, with european profile cylinder and covered by a security escutcheon*

## Items no. 4434.T5 and 4434.T10

- Steel structure in compliance with UNI EN 10130, 1.5 mm thick. Rounded edges to avoid abrasion. Two holes on the rear for fixing to the wall.
- Door rebated on three sides; pull-resistant hinge side. Anti-drill and pull-resistant carbonitrieted solid steel security escutcheon with rotating plate. Steel door back cover 2 mm thick.
- Steel made rotating deadbolts resistant to attack: 2 horizontal Ø 22 mm and 2 vertical Ø 22 mm.
- Lock operated by a European profile half cylinder (length 50+10=60 mm and DIN cam). Easy to replace. Supplied with the "Europro" half cylinder equipped with 5 reversible and flat nickel plated brass keys and ownership card packed in a sealed envelope.
- Capacity:  
**5 guns housing for item no. 4434.T5**  
**10 guns housing for item no. 4434.T10**
- **Optional:**  
 On request:  
 the cabinet painted with a technique providing an elegant "wood colour" finish (add ".L" at the end of the item code; in this case, security escutcheon will be in brass finish).

Safety box for ammunitions/objects equipped with a Fai by Viro lock, supplied with 2 keys

High concentration and scratch-proof polyethylene gun housing and rack (increased in thickness, that provides the perfect setting of single or double-barreled rifles, even with optical)
